

# Actek RFID Hotel Lock System

# Actek RFID Hotel Lock System

The Actek Hotel Lock System is specially designed to meet the needs of small-medium hotels, maximum security, individual style and low operation costs. It allows for comprehensive access control and system management, but with extremely user-friendly software.

- Check-in, check-out and reservation for hotel guest
- Set card expiration date/time
- Create master, building, floor and other employee cards
- Create lost card to remove lost/stolen cards from the system
- Create record card to get the unlock logs from the hotel lock
- Matrix design allow you to see the room status
- All issued cards are logged in the software for viewing at any time
- Easy to program
- Requires USB encoder to program mifare cards
