

# Fee Computer / Cashier Station

# Fee Computer / Cashier Station

## Standard Features

- The Actek Fee Computer is a state of the art Parking and Revenue Control Fee Computer, boasting the most advanced and virtually bullet proof reporting and revenue verification tools on the market.
- Windows based, offering full networking or stand alone ability for Pay on Entry, Pay on Exit, Central Pay point Parking Systems.
- It is able to operate as a conventional manual time entry or a barcode encoded time entry system. Unlike any other Barcode system currently available, it retains all of the auditable functions of the conventional system without the human error factor as the tickets are still validated. A Firm base touch screen monitor as well as a state of the art thermal printer providing high resolution, speed validation and receipt printing at 250mm per second.
- We supply an externally mounted "Hi-bright" LED fee display with all of our units.
