

License Plate Recognition System

License Plate Recognition System

We specialise in turn-key License Plate Recognition (LRP) / Automatic Number Plate Recognition (ANPR) System solutions.

We offer fully customisable and often unique customer specific turnkey solutions for any industry or requirements. Whether you have a truck stop, parking garage, housing estate or office park with any requirement to link license plate numbers to gaining access or billing we will have or develop a solution for you.

Our solutions include:

Specialised LPR or ANPR Cameras (Hardware)

Actek LPR Management software

Integration with 3rd party ERP or accounting software

Integration with parking systems (Linking license plate number with parking ticket)

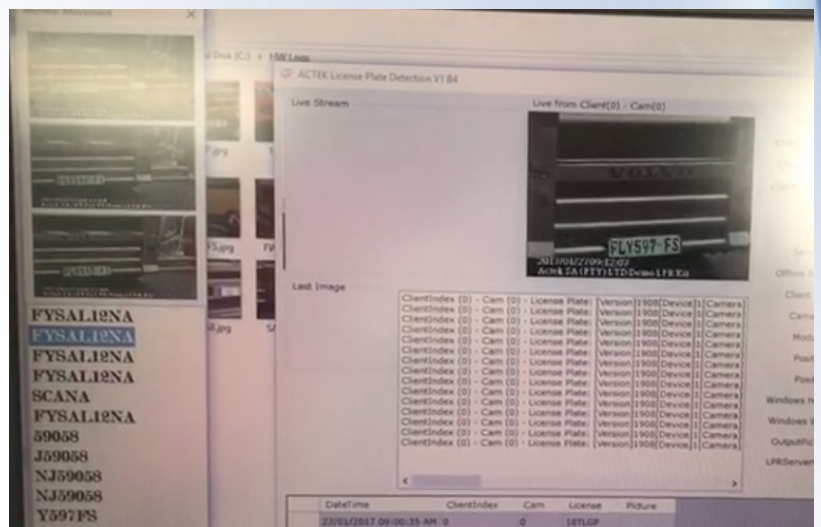

Cash-less Parking Solutions

On-line verification of stolen vehicles or vehicle involved in robberies with Enatis (South Africa only)

How it works:

Images captured by specialised LPR cameras, automatically capture the license plate number in real time allowing our specialised and fully customisable software to link the license plate number to parking tickets, compare with pre-defined databases, submit to Enatis for verification, export number for automatic billing etc., trigger boomgate barriers to open via I/O and so much more.

Depending on the requirements, we can supply LPR cameras that can read number plates at high speed, at stand still, in complete darkness, with high beams on etc. Our solutions are very effective, reliable and cost effective.

Designed and manufactured in South Africa,
for the harsh African environment
